## CAREER OBJECTIVE

As a final-year Information Technology student, I am seeking an internship opportunity in a professional environment where I can apply my academic knowledge to real-world projects. In the short term, I aim to strengthen my programming skills, improve teamwork, and gain hands-on experience with the software development lifecycle. In the long term, I aspire to become a technically strong developer who delivers measurable value to products and development teams

## EDUCATION

University of Transport and Communications2022-Now

- Faculty of Information Technology – International Program
- GPA: 3.0/4.0 | TOEIC: 700

## TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, Dart, C#, Java, C/C++
Frontend	React, Next.js, React Native, Flutter, HTML/CSS, TailwindCSS, GSAP, Three.js
Backend	Node.js, Express.js, FastAPI, RESTful API
Databases	PostgreSQL, MongoDB, MySQL, SQLite, SQL Server, Supabase, Firebase
AI / ML	TensorFlow, MediaPipe, LangChain, OpenCV, Google Gemini, OpenAI API
Cloud & Tools	Vercel, Firebase, Supabase, Cloudinary, Google Cloud, GitHub, Docker, Postman

## WORK EXPERIENCE

Docas LLC – Seller (Dropshipping)04/2023 – 12/2024

- Designed product pages using Shopify, PageFly, and GemPages
- Analyzed user behavior with Vitals and Hotjar; optimized Facebook Ads content with A/B testing
- Result: Reduced CPC to \$0.6–0.8 and cut cost per order by 32% through bundle strategy

## FEATURED PROJECTS

1. Camera Order Management Website

Tech stack: Next.js 14, React 18, TypeScript, TailwindCSS, Supabase (PostgreSQL), OpenAI API

Role: Fullstack Developer

- Built a fullstack web app for camera order management
- Integrated OpenAI API to automate booking creation for camera orders
- Designed responsive UI with TailwindCSS including dark mode support
- Managed data with Supabase (PostgreSQL), implementing a complete CRUD system

2. English Vocabulary LearningApp (Edu/Tech)

Tech stack: React 19, TypeScript, Supabase, Google Gemini API

Role: Fullstack Developer

- ▶ Developed a web app for English vocabulary learning integrated with AI and Spaced Repetition algorithm
- ▶ Integrated Google GeminiAPI to generate contextual examples, explanations, and smart vocabulary suggestions
- ▶ Designed a spaced repetition system to help users memorize vocabulary effectively and long-term
- ▶ Built end-to-end from frontend to database schema, authentication, and API integration

### 3. Cho Que – Local Services Mobile App

**Tech stack:** Flutter, Dart, Supabase, VietMap API

**Role:** Lead Developer

- ▶ Developed a mobile app providing food delivery, ride-hailing, and general delivery services for Nga Son District
- ▶ Integrated VietMap API for geolocation and navigation, Supabase for real-time backend
- ▶ Designed database schema and built a complete order placement and management system

### 4. Sports Court BookingApp (Android)

**Tech stack:** Android Studio, Java, Firebase, Retrofit

**Role:** Frontend Developer – UI/UX & API Integration

- ▶ Developed user interface and connected RESTful APIs for a sports court booking application
- ▶ Utilized Firebase for authentication and real-time database management

## CAREER OBJECTIVE

---

- ▶ TOEIC 700
- ▶ 3rd Prize – Scientific Research Competition (2023)

## ACTIVITIES

---

### UTC Blood Donation Club – External Relations

Nov 2022 – May 2023

- ▶ Mobilized blood donations, connected volunteers and sponsors
- ▶ Organized events and managed social media communications
